VOLUME CONTENTS

Volume 11 Number 1

A. P. Shorygin	1	Non-linear effects in electrochemical cells subjected to alternating current and a magnetic field
K. J. Cheng and M. J. Miksis	9	Shape and stability of a drop on a conducting plane in an electric field
Wang Rong and A. Sanfeld	21	Convective stability of immiscible fluids in parallel shearing movement: role of the diffusion
N. B. Singh, R. Mazelsky and M. E. Glicksman	41	Evaluation of transport conditions during PVT growth: mercurous chloride system
Y. Hagiwara	49	Numerical analysis of 3-D interfacial shape and velocity distribution of liquid film
A. Henriette, C. G. Jacquin and P. M. Adler	63	The effective permeability of heterogeneous porous media
A. Nadarajah and R. Narayanan	81	Morphological instability in dilute binary systems: a uniform approach
W. J. Hiller and T. A. Kowalewski	103	Surface tension measurements by the oscillating droplet method

Volume 11 Number 2

M. Y. Boluk and T. G. M. van de Ven	113	Kinetics of electrostatically controlled deposition of colloidal particles on solid surfaces in stagnation point flow
P. A. Houghton and T. A. Hatton	129	Transient effects in the description of axial dispersion in polydisperse two-phase systems
P. A. Worfolk, A. Nadim and M. Pagitsas	167	Dispersion of reactive species in laminar channel flows: electrochemical effects
O. Vizika and A. C. Payatakes	187	Parametric experimental study of forced imbibition in porous media
C. R. Ethier and R. D. Kamm	205	Mass transfer during rate-limited Langmuir adsorption in a pore
C. R. Ethier and R. D. Kamm	219	Flow through partially gel-filled channels
M. Z. Sengun and R. F. Probstein	229	High-shear-limit viscosity and the maximum packing fraction in concentrated monomodal suspensions

Volume 11 Number 3

E. Chervenivanova and Z. Zapryanov	243	On the deformation of compound multiphase drops at low Reynolds numbers
I. L. Claeys and J. F. Brady	261	Lubrication singularities of the grand resistance tensor for two arbitrary particles
Y.-J. Kim and W. J. Rae	295	Stokes-flow sedimentation of a slender-filament helical coil
A. Nadim and H. Brenner	315	Long-time nonpreaveraged diffusion and sedimentation properties of flexible Brownian dumbbells
W. J. Milliken, L. A. Mondy, M. Gottlieb, A. L. Graham and R. L. Powell	341	The effect of the diameter of falling balls on the apparent viscosity of suspensions of spheres and rods
H. Kopetsch	357	Numerical simulation of the Czochralski bulk flow of silicon on a domain confined by a moving crystal–melt interface and a curved melt–gas meniscus
D. T. Leighton, Jr	377	Diffusion from an initial point distribution in an unbounded oscillating simple shear flow

Volume 11 Number 4

G. B. McFadden, S. R. Coriell, M. E. Glicksman and M. E. Selleck	387	Instability of a Taylor–Couette flow interacting with a crystal-melt interface
E. J. Fordham and H. K. J. Ladva	411	Cross-flow filtration of bentonite suspensions
H. Mikami	441	Numerical simulation of nonequilibrium condensation in gas dynamic expansion
H. S. Sellers and H. Brenner	455	Translational and rotational motions of a sphere in a dipolar suspension
M. Pagitsas	467	Effective transport coefficients of Brownian particles in convective–diffusive processes: the cumulant expansion method
N. Brauner and D. Moalem Maron	487	Two phase liquid–liquid stratified flow
B. U. Felderhof and R. B. Jones	507	Creeping flow hydrodynamics of droplets and vesicles

S. M. Sami 519 A transient model for analysis and prediction of flooding in counter-current annular two-phase flows

M. A. Azouni 531 Some experimental aspects of thermoconvective instabilities in the non-linear regime

Seung-Man Yang and L. G. Leal 543 Motions of a porous particle in Stokes flow near a plane-fluid interface

J. W. Wilder 571 Similarity and numerical solutions for chemical vapor deposition problems

J. R. Sachs and A. J. Grodzinsky 585 An electromechanically coupled poroelastic medium driven by an applied electric current: surface detection of bulk material properties.

Volume 11 Number 5/6

SPECIAL ISSUE

PHYSICOCHEMICAL HYDRODYNAMICS: 7th INTERNATIONAL CONFERENCE

J. Szekely 615 Foreword

M. Ben Amar and Y. Pomeau 617 Needle crystal growth in a forced flow: scaling laws

H. Ben Hadid, B. Roux and P. Laure 625 Thermocapillarity effects on the stability of buoyancy-driven flows in shallow cavities

P. Cerisier and M. Lin 645 Diffusion of tracer in a pattern of convective hexagonal cells

P. Cerisier and M. Zouine 659 Disorder and wave number selection in Bénard–Marangoni instability

S. Cioulachtjian, L. Tadrist, R. Occelli, R. Santini and J. Pantaloni 671 Heat transfer in porous media crossed by a flowing fluid: visualization of the boiling zone

E. Crespo del Arco, J. P. Pulicani and P. Bontoux 681 Simulation and analysis of the time-dependent convection in low-*Pr* liquids

J. P. Fontaine and A. Randriamampianina	693	Simulation of flow regimes in a liquid-encapsulated Czochralski configuration
Z. Harel, J. Tanny and A. Tsinober	703	Double diffusive phenomena in a stratified fluid close to saturation
O. J. Ilegbusi and J. Szekely	715	Electromagnetic and fluid flow phenomena in conventional and in shallow tundishes
Y. Kamotani and K. J. Lee	729	Oscillatory thermocapillary flow in a liquid column heated by a ring heater
M. Kassemi and W. M. B. Duval	737	Effect of gas and surface radiation on crystal growth from the vapor phase
A. Nadim and A. Borhan	753	The effects of surfactants on the motion and deformation of a droplet in thermocapillary migration
D. Rivas and S. Ostrach	765	Low-Prandtl-number thermocapillary flows in shallow enclosures
A. P. Shapiro, P. C. Renaud and R. F. Probstein	785	Preliminary studies on the removal of chemical species from saturated porous media by electro-osmosis
L. Tadrist, R. Occelli, R. Santini and J. Pantaloni	803	Liquid jet in an immiscible liquid: experimental and numerical study
M. Zell, J. Straub and B. Vogel	813	Pool boiling under microgravity
	824	Erratum
	i	Volume Contents and Author Index
